

Recount Remixers,

SONY ACID FILES and PROJECT

=====

These mp3s have been ACIDised at 80.002 beats per minute. The project file was made in ACID PRO 6 and I am not sure if it will work in the ACID xpress versions. If not, you can simply open a new project and set it to 80BPM, Pitch A and 4/4 time signature.

Please note that the following files have issues:

- The WURLIE starts before the beat by less than 1/4 of a beat
- The Drum Beat starts with the drum fill
- With both these files you will just need to line them up.
- I have done that for you in the PROJECT file.

Drop me a line if you have any issues.
